

Avery Burkemper

I felt like my answers to the assessment questions were accurate and straightforward. Everytime I find information for my research, I first have to find the relevant sources. The right sources will then help me to find the right information I need. I have found it extremely easier to already have reliable sources before trying to collect information. The reason behind this is because you may find information that is great, but that does not mean that it will always be relevant and beneficial for your research if you do not have reliable sources. During the research process, I first pick the genre and then find the sources I want to use for finding the required information according to the genre I chose. I then start to collect information that I know will assist me when I start to write my paper. I realized it is extremely important to make sure the sources and information I am using are relevant, significant, and important.
