

Reading Journal

Copy + Paste this template into a different document (do not try to type directly on it). Then fill it out and post to your blog.

Title of Article + Proper MLA Citation for Works Cited page	Driscoll Lynn Dana, "Introduction to primary Research; Observations, surveys and interviews", Creative Commons license , 2011, 153-174
Summarize the article -- include your reaction, thoughts, anything to help you remember its claims. 100 to 150 words	<p>The journal teaches the reader how to properly research for a paper and how to properly stage the gathering of information. The paper goes into detail on the steps to take before writing this kind of research paper. The paper shows how to ethically use information when using information by survey or interviews. This will be necessary as in the 4th paper includes an interview by a person within the community that you are researching. It of course would be necessary to maintain a respective relationship with the interviewed as you don't want to accidentally "dox" a person who didn't want their name associated with the paper. The paper also explains the two types of research that are used in research which could help a person for developing the paper. It also explains bias for the reader to be aware of so they understand why they came up with their conclusions.</p>

<p>Define new terms and concepts by quoting or paraphrasing the original author.</p>	<ul style="list-style-type: none"> ● Observations: "Observing and measuring the world around you, including observations of people and other measurable"(154) ● Interviews: "Asking participants questions in a one-on-one or small group setting"(154) ● Surveys: "Asking participants about their opinions and behaviors through a short questionnaire"(pg 154) ● Voluntary Participation: permission to involve a person in an interview or survey(155) ● Confidentiality and anonymity: keep participants anonymous depending on the information(156) ● Researcher Bias: "Bias might be present in the way you ask questions, the way you take notes, or the conclusions you draw from the data you collect(156) ● Inductive Reasoning", where researchers start with a question and collect information that eventually leads to a conclusion"(158) ● Deductive reasoning", where researchers start with a hypothesis or general conclusion and then collect specific data to support or refute their hypothesis"(158)
<p>How does this reading connect to other articles from class and/or your own research?</p>	<p>This will be necessary in our next major paper as there will be necessary research in this major paper.</p>
<p>Based on the reading, craft one question to act as a springboard for class discussion.</p>
